EXPERIENCE

Software Engineer Intern Blackfort Consulting PH

Feb – May 2026

- Shipped features across 20+ sprints on 2 concurrent client projects in a professional Agile/Scrum environment on Azure DevOps
- Resolved 20+ bug tickets and submitted 20+ PRs reviewed and approved by senior engineers across both projects
- Diagnosed and fixed defects across a 14-project Clean Architecture .NET 9 solution (Blazor WebAssembly, CQRS, MediatR, EF Core) within sprint estimates
- Translated Figma designs into production-ready React components, delivering client-requested updates across multiple feedback cycles

Software QA Tester Upwork (Freelance)

May – Jun 2026

- Tested 2 live client platforms end-to-end and produced structured written reports with screen-recorded proof-of-testing for both product teams
- Validated full user journeys across webinar SaaS and Shopify dropshipping platforms, surfacing usability gaps across onboarding and order fulfillment flows

PROJECTS

Saan Tayo Kakain

May 2026

Next.js · TypeScript · Redis · Playwright · Vercel

- Engineered and launched a live GPS-based restaurant picker PWA achieving Lighthouse scores of 99 (desktop) and 92 (mobile) with perfect 100/100 Best Practices and SEO
- Identified a serverless multi-instance rate limiter vulnerability and patched it by migrating to Upstash Redis (INCR + EXPIRE) across all Vercel function instances
- Authored 37 Playwright E2E test cases and resolved a Zustand SSR hydration race condition, achieving zero production edge cases

TLL Daily Drill (WikayGaling)

Mar – May 2026

React · Tailwind CSS · Strapi v5 · Azure DevOps

- Built the complete quiz frontend across 3 question formats with countdown timers and star-based scoring
- Implemented localStorage persistence enabling zero-data-loss sessions for live users on unstable connections

BF Timesheet

Feb – May 2026

.NET 9 · Blazor WebAssembly · EF Core · PostgreSQL · Docker · Azure DevOps

- Navigated a 14-project Clean Architecture enterprise codebase (CQRS, MediatR, .NET Aspire) and resolved defects across Blazor client and ASP.NET Core Web API layers
- Delivered all fixes within sprint estimates while adapting to established enterprise code style

NamNam

May 2026

Flutter · Dart · Firebase

- Led a 3-person team as sole architect from Figma wireframes to working APK within a single semester deadline
- Built real-time multi-parameter Firestore search and automated rating aggregation via Firestore listeners

StudAI

Aug – Dec 2025

React · Node.js · MySQL · Firebase · OpenAI · DigitalOcean

- Built a real-time 5-player quiz battle system validated by 27 UST-CICS beta users with live score sync and results committed to MySQL in a single transaction
- Integrated OpenAI API for AI-powered quiz generation and built a solo DeepEval evaluation suite using GPT-3.5-turbo as LLM judge, achieving 9/9 pass rate across summarization and chatbot quality metrics
